

Enormous Tomatoes Grown Using Natural Action Technologies Structured Water Units

These pictures were taken in the garden, at the home of Mr. Laphon Puyo's where his amazing tomatoes are watered with Natural Action Technologies structured water.

He writes:

I am retired close to the city of Pau, in France, and let me inform you about the results I have thanks to Natural Action Structured Water. The pictures I send you are proving the results I had in my garden.

Baths feel better, pH is stabilized to 7, I don't have to use pH reducer anymore. □ And these tomatoes are out of this world! The one in the bottom picture is over 2 lbs (1kg) all by itself!
